DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Misaka (USPN 5859729). Misaka teaches a zoom lens device having four lens groups (column 1, lines 7-8) wherein the first lens group has a positive refractive power, the second lens group has a negative refractive power, the third lens group has a positive refractive power and the fourth lens group has a negative refractive power (column 3, lines 4-8) in the order from the object side to the image side as claimed in independent claim 1. Misaka also teaches a zoom lens satisfying the condition wherein the difference between the axial distance between the positive first lens group and the negative second lens group at the long focal length extremity and the axial distance between the positive first lens group and the negative second lens group at the short focal length extremity divided by the focal length of the entire system at the short length extremity are within the limitations as set forth in independent claim 1 and further satisfying the condition wherein the traveling distance of the positive first lens group from the short focal length extremity to the long focal length extremity divided by the traveling distance of the negative fourth lens group from the short focal length extremity to the long focal length extremity satisfies the limitation as set forth in independent claim 1 (column 11, lines 36-66).

Art Unit: 2873

Allowable Subject Matter

Claims 2-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takahashi (USPN 3501224), Fujibayashi (USPN 4398808), Ishiyama (USPN 4498741), Tanaka et al (USPN 5528427), Kudo (USPN 5870230), Park (USPN 5903398), Kohno et al (USPN 6002529), Hayakawa et al (USPN 6373639), Misaka (USPN 6788464) and Eguchi (USPN 6829106) all teach a four lens group zoom lens systems.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Darryl J. Collins whose telephone number is 571-272-2325. The examiner can normally be reached on 6:30 - 5:00 Monday - Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Y. Epps can be reached on 571-272-2328. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 2873

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
